Thank you for participating in the KidsID child safety program. We hope that the kit we are about to build for your child will never need to be used.

The importance of this kit is very simple. If your child is ever missing, this kit allows you to save precious time, so that you might be reunited with your child. The most critical time for a missing child is the first 24 hours. This kit gives you that ability to instantly provide law enforcement with the information they need to know.

The kit referred to is the large envelope provided to you at the DNA station.

Once completed, the most important KidsID child safety program elements are the DNA swab and the DVD. (Remember the DVD is Amber alert ready.)

All the paper you have been given back should be discarded (destroyed) once you are home. Everything on the papers is included on the DVD.

One important thing to remember is, if possible, you should get a new KidsID kit made every year until your child reaches high school, then every other year.

Please feel free to ask any question(s) as you go through each station.
